ICAO Global

ICAO PBN Publication Master Resource

ICAO New Product

A complete collection of all ICAO publications and annexes related to Performance-based Navigation (PBN).
The package covers all key function areas of PBN - Air Traffic Service and Management (ATM/ATS): Air Navigation and Infrastructure; Operation of Aircraft; Aviation Information System and Communications (AIS/CNS) and relevant ICAO Annexes.
Member States and industry stakeholders can use this comprehensive set as reference and guidance materials to facilitate their implementation of PBN programmes in compliance with ICAO standards set in ICAO Resolution A37-11.

ICAO SLEDs: Register of State Letters

[↑ TOP](#)

The only way most controllers can respond to ICAO's proposed changes is through IFATCA's 'observer status' with ICAO. All ICAO State Letters (SLEDs) sent to IFATCA are forwarded to our Member Associations through the IWEN and our MAs can respond to the IFATCA CONTACT listed in the 'REGISTER OF STATE LETTERS' in IWEN. You, the MA, can consider the State Letters and forward your view to the IFATCA contact by the date in the 'REPLY TO/BY' date column. These views will be collated by the Executive Board and included in the preparation material for our response to ICAO: allowing us to have a broader cross-section of views from the ATC community as well as providing MAs with this unique opportunity.

How do the avionics select an ACSP?

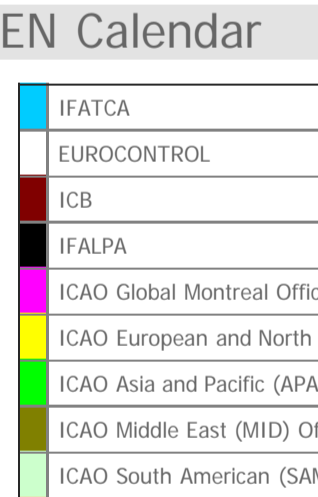

DLISG

In response to a request at the DLISG, the CRO has contacted the various avionics manufacturers to ask them to explain how their avionics select which ACSP to connect to and whether the aircraft operator can control which ACSP to use and if so how it can be controlled. The replies of those avionics suppliers that responded are reproduced here

Deciphering Slick Runways

AeroSafety World - May 2013

"Slippery as grease" may be an apt way to describe those wet runways, but the analytical of any characterization is greatly increased when it is coupled with FOQA data and sophisticated analytical tools that today help airlines and pilots identify runways that are likely to be slick in certain conditions. In this month's cover story, we take an in-depth look at a test launched by Continental Airlines, now merged with United Airlines, to develop a framework to better utilize FOQA and other data to improve the safety and efficiency of operations.
