### SESAR WP E Serious Gaming in ATM WS

EATCHIP Meeting Report

In the AeroGame project, the National aerospace laboratory NLR, Thales and the University of Twente will develop a serious gaming environment for the SESAR WP E. The goal is to develop a tool that can be used to support the Traffic Synchronisation (ATC). This will benefit a Single European Sky (SES) requires significant changes in the ATC system in Europe. This process involves the cooperation of many stakeholders, each with their own interests. The AeroGame environment will be used to explore how these changes can be made acceptable. At the same time technological developments will take place and more information about the ETM system to become available to stakeholders to start new decision making process. Although this is clearly a long term research project, the first steps will be taken in the coming years. The AeroGame environment will be the necessary 'playing ground' to study and highly complex system in a realistic manner. The AeroGame environment will be used to study the impact of the ETM system on the ATC system and to support the decision making processes to design or even and in deadlock which further hinders the change process. The AeroGame environment will be used to support the decision making processes to design the ATM system by introducing the 'Enabling change in ATM' theme in the WP E thematic groups.

### ICAO SLEDs: Register of State Letters

The only one thing which IFATCA is concerned is ICAO proposed changes is through IFATCA's Representative to ICAO Council. Any proposed changes to SARPs and PANS-ATM are to IFATCA are forwarded to our Member Associations through the IWEN and our Mrs can respond to the IFATCA CONTACT Head in the REGISTER OF STATE LETTERS. The ICAO Council will then decide on the proposed changes. Any changes to ICAO Annexes are to be done by the IWEN-TUNNY Staff members. These rules are called by the Executive Board and included in the preparation material for our meeting in Montreal. Any action is to have a broader cross-section of the IFATCA membership to be involved in the process of developing ICAO policy.

### AeroSafety World
CAN 2013 Issue 7

- More than 2,000 pilots are now flying with the new ICAO license.
- Reports show how fuel is guide by implementing ICAO in maintenance shops and on the ramp.
- Inspiring the Decision to Go Around
- Flight and simulator data analyses seek to ameliorate risks such as unstable approaches.
- With a battery for approaches, Boeing 787s return to the air.
- Approaches for unspoken needs of flight attendants and passengers reshapes cabin safety training.
- Sophisticated analytical tools are available to enhance decision making.
