ICAO Safety Management Panel

IFATCA Meeting Report

This was my first meeting on behalf of IFATCA in the ICAO Safety Management Panel. It was a full Panel Meeting including Breakout sessions of the three working groups. IFATCA is part of Working Group 3 which is dealing with Safety Data Collection and Safety Data Protection, as part of the recently amended Annex 19 in regard to Safety Management Systems.

ICAO Global

ICAO State Letters

The only way most controllers can respond to proposed changes is through IFATCA's status with ICAO. All ICAO State Letters (SLEDs) sent to IFATCA are forwarded to our Member Associations through the IWEN and our MAs can respond to the IFATCA CONTACT listed in the 'REGISTER OF STATE LETTERS' in IWEN. You, the MA, can consider the State Letters and forward your view to the IFATCA contact by the date in the 'REPLY TO/By' date column. These views will be collated by the Executive Board and included in the preparation material for our response to ICAO; allowing us to have a broader cross-section of views from the ATC community as well as providing MAs with this unique opportunity.

FAA establishing new rule making committee for UAS

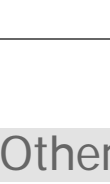

The U.S. Department of Transportation's Federal Aviation Administration (FAA) is establishing an aviation rulemaking committee with industry stakeholders to develop recommendations for a regulatory framework that would allow certain UAS to be operated over people who are not directly involved in the operation of the aircraft.

Drones must follow air traffic rules, says IATA

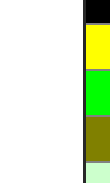

In view of safety risks posed by drones to aircraft, the International Air Transport Association (IATA) has said air traffic rules should be followed by drones operating in the same airspace as manned aircraft.

Ask yourself - is the runway visual perspective what I would expect at this point on the approach?

On 8 March 2013, the crew of an aircraft descended below controlled airspace and to within 600 feet agl when still 9nm from the landing runway at Melbourne after mismanaging a visual approach flown with the AP engaged. An EGWS Terrain Alert was followed by an EGPWS PULL UP Warning and a full recovery manoeuvre was flown. The investigation found degraded situational awareness had followed inappropriate use of Flight Management System.
