Information for MAs & IFATCA Reps

Air Traffic Situation in Belgium

IFATCA Press Release

> The Executive Committee of Air Traffic Controllers' Associations, IFATCA, is deeply concerned about the developments within Belgocontrol, the Belgian air traffic services provider, and the problems these have caused for the safe and efficient flow of air traffic in Belgium.

ICAO-MID First Meeting of the Accident and Incident Analysis Working Group (AIA WG1)

ICAO Meeting Report

> The AIA WG was established by the MASG-MIDA meeting, Jeddah, Saudi Arabia, 30 March-2 April 2015, with a mandate to promote, develop and implement on a regional basis the accidents and incidents at the regional level and provide an agreed and harmonized regional dataset of accidents and incidents. The Group shall also be tasked to identify, monitor, identify the main root causes and contributing factors of the accidents and incidents.

- IFATCA Report by Mohamad Talaat Metwally

Flight Safety Conference (FCF)

IFATCA Meeting Report

> No theme as such but what hinders safety today: Regulations (far too much changes, no time to understand and train on one the next one already coming) e.g. RNP-AR approaches) Terrorism (GSI), Business first mentality (pressure on management to operate ALWAYS), Fatigue, a broad cross-section of views from professionals was found on providing links with this and other issues.

ICAO Global

ICAO State Letters

The only way most controllers can respond to proposed changes is through IFATCA's status within ICAO. All of the State Letters listed below are open for comment. If you have any comments please contact your MA or the IFATCA Rep to ICAO. The IFATCA ICAO CONTACT listed at the REGISTER OF STATE LETTERS is HERE.

Please note that the "Reply To" date is the date by which your comments must be received by ICAO. The "REPLY TO/BY" date indicates: These states will be included in the IFATCA compilation to be used in the response material for response to ICAO; allowing us to have a broader cross-section of views from controllers around the world and providing time with this in mind.

Understaffed and overworked ATCs told to work longer

THE TIMES OF INDIA

Airports Authority of India (AAI) has come out with a controversial solution that will end up reducing the number of air traffic controllers in the country.

In an order issued on Monday, AAI has asked air traffic controllers (ATCs) to work for 12 hours a month — meaning two extra six-hour shifts that will lead to the loss of two days. It will hit the Mumbai air traffic control the most, where overworked controllers work four hours more than the guideline of 6 hours a month already.

Draft EUROCONTROL Specification for Time Based Separation (TBS) for Final Approach - Ongoing

The Time-Based Separation (TBS) concept defines a set of wake separation rules in terms of time rather than distance for aircraft established on the same approach procedure. TBS is intended to be a tactical controller tool support to translate the required time separation / spacing into the equivalent distance separation / spacing for the prevailing headwind condition to enable visualisation of the required time separation / spacing by the Approach and Tower Controller Working Positions (TWP).

Other Information

How much should ATM contingency cost?

Air traffic management is a very safety-conscious business and policy makers have a role to play in establishing investment levels for ATM contingency. Paul Hannelli asks if they should invest in technical resilience or contingency arrangements, or both.

Solar Impulse ready to resume First Round-the-World Solar Flight from Hawaii

Tanoa pioneers Barnaud Picard and André Borschberg are ready to resume their attempt to achieve the first ever Round-the-World Solar Flight with zero fuel. Despite a 2,000 km stretch of unfavorable weather and a 9,000 m climb to a high ceiling of over 8,500 m, the pilots managed to keep the aircraft flying at night without any fuel. After replacing overheated batteries and running maintenance checks, the aircraft is now ready to fly from Hawaii to Phoenix, Arizona, USA, with a stop in Tulsa, Oklahoma, before crossing the Atlantic Ocean to North Africa, despite the current lack of difficult weather conditions. The goal of this entire endeavor is to demonstrate how modern clean technologies can achieve the impossible.
